

## Unpacking Your Supernova

The Supernova is double boxed for product safety. We highly suggest having a padded surface and at least two (2) people to safely unpack the Supernova.

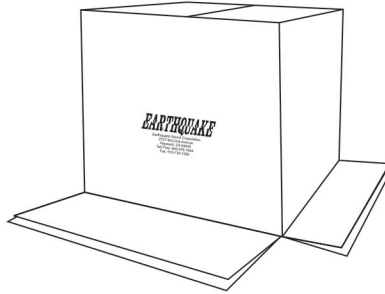

### **Step 1**

On a padded surface, carefully place the box on its side to remove the bottom packing tape and staples.

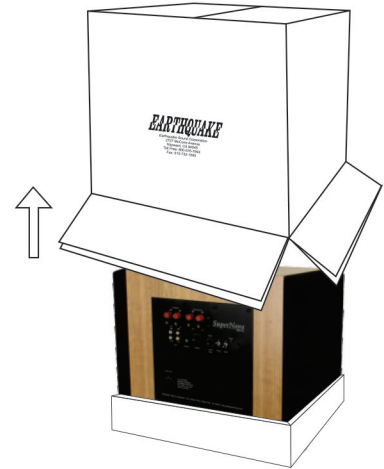

### **Step 2**

Without tilting the box too much, tug the bottom flaps outward and keep the protective foam in place.

### **Step 3**

Gently reposition the box upright.

### **Step 4**

Slide the box off, minding the protective foam on the top, bottom, and sides of the subwoofer.
