Winner of 2009 Exc!te Award
from Custom Retailer Magazine

2010 International CES Innovations
Design & Engineering Award Honoree

OBJECTIVE

The Couch Potato (CP-8) is a self-powered (300 watts Max), down firing subwoofer. Its slim enclosure design and placement flexibility make it a perfect fit under the sofa, behind it, under the bed or in any other tight spaces.

In addition to the built-in 300-Watt Max amplifier, the CP-8 subwoofer also features an RCA input, high level input with a crossed high level output. The CP-8 high output level is designed to match typical satellite speaker systems and to enhance overall sound quality and performance for your system.

The CP-8 is perfect for smaller homes, condominiums and apartments where "space counts", while remaining "budget friendly".

INTENDED USE

- ✓ Contractors, Custom Installers & Retailers
- ✓ Home Theaters/5.1 & 2-Channel/Music Systems
- ✓ Town Homes/Condos/Apartments
- ✓ RVs & Yachts
