

NEW MiniMe DSP Subwoofers

P10/P12

"There might be better subwoofers on the planet, but I haven't heard them."

*Steven Stone
Home Theater magazine*

DSP Control

Expanding on the great MiniMe series of subwoofers, Earthquake Sound is proud to introduce a new member to the MiniMe family. The MiniMe DSP P10/P12 powered subwoofers utilize Earthquake's advanced class "D" circuitry with over 90% efficiency plus the added benefits of DSP control through mobile devices.

Complicated and professional room tuning is now made possible right at your fingertips through a mobile app allowing the user to dial in this MiniMe exactly to the room that it is placed in.

In order to optimize sound and clarity on a subwoofer, it must be tuned properly to its environment. Through an automated room correction process that the iWoofer™ Pro app offers, you will get the customized performance that you deserve and achieve the maximum amount of SPL and a more linear response for your home theater. Up to a 48dB/octave crossover is also available within the application for a steep frequency cutoff.

SLAPS Passive Radiator

The MiniMe DSP would not be complete without our patented and infamous SLAPS passive radiator technology. It dramatically increases the subwoofer's efficiency and capability for subharmonic frequency reproduction and high SPL that can be felt. The unique design of the SLAPS passive radiator employs dual identical suspensions and a specified mass that allows it to move the same amount of air in either direction. When coupled with a premium active driver, SLAPS enables the sub to deliver more bass at sub harmonic levels while reducing the load on the amplifier.

Stunning Looks

The MiniMe DSP not only sounds amazing but it also features stunning looks with its finely finished deep multi-layered black piano lacquer and high gloss clear coat. The MiniMe DSP is sure to fit in with your home decor and more importantly compliment your home theater. When it comes to elegance and performance, MiniMe DSP has set the bar and will dish out some serious bass for your enjoyment. For more information please visit the product page from the link below.
